| PREREQUISITE COURSES             | ment None   | pecial background (Bio   | ethics), Skills develop- |

# 2. LEARNING OUTCOMES

# Learning Outcomes

This course aims that students acquire knowledge, skills and competences related to level 7 of the European Qualifications Framework for Lifelong Learning. In particular, the course aims at students' learning and familiarizing with the concepts of Research Methodology (approaches, design, collection, processing, analysis of data), as well as its Ethical aspect, as it should be applied in any research experimental approach to the solution of a scientific problem (good practices, disdain of malpractices, conflict of interest, personal data, etc.).

Upon successful completion of the course, students:

- 1. will have acquired the necessary knowledge to understand the legal, and ethical frame-work governing scientific research.
- 2. will be able to complete the design of an experimental research project, starting from the literature review, drafting a research protocol, writing the methodology, processing the results, up to evaluating and drawing the final conclusions.

- 3. will have gained experience in the descriptive indexing of a large amount of information and the "art" of presenting a topic to a specialized and / or non-relevant audience.
- 4. will have developed the study skills necessary for their further scientific training and professional development.

# **General Competences**

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Working independently
- Team work
- Decision-making
- Respect for difference and multiculturalism
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Working in an international environment
- Working in an interdisciplinary environment
- Production of free, creative and inductive thinking

#### 3. SYLLABUS

- 1. Introduction to Research Methodology
- 2. Phases and Steps of Conducting a Study & Selecting or Identifying Research Problems
- 3. Literature Review
- 4. Quantitative research in Health Sciences
- 5. Qualitative research in Health Sciences
- 6. Sampling
- 7. Data Analysis
- 8. Writing a Research Report Dissertation
- 9. Therapeutic and Non-Therapeutic Clinical Research
- 10. Topics for Discussion: Orphan Drugs, Placebo, Nocebo, Research in Minorities
- 11. Research Practices Scientific Education
- 12. Discrediting Unethical Research Practices Conflict of Interest
- 13. Genethics: Ethics in personalized medicine and therapeutics
- 14. Ethics in laboratory animals research

#### 4. TEACHING and LEARNING METHODS - EVALUATION

| DELIVERY  | Face to face   |  |
|---|--|--|
| USE of INFORMATION and<br>COMMUNICATIONS TECHNOLOGY | Use of ICT in teaching and communication with students (i.e., e-class, emails. PowerPoint presentations) |  |

| TEACHING METHODS                  | <i>Activity</i><br>Lectures<br>Directed Study   | Semester Workload<br>13<br>35 |
|-----------------------------------|---|-------------------------------|
|                                   | non-Directed Study  | 52                            |
|                                   | <i>Course Total</i><br>(25 hours of work-load per ECTS credit)  | 100                           |
| STUDENT PERFORMANCE<br>EVALUATION | <ul> <li>Language of Evaluation: Greek / English</li> <li>Written exams <ul> <li>Multiple choice questionnaires, Short a ended questions</li> </ul> </li> </ul> | answer questions, Open        |
